

China Telecom (Deutschland) GmbH Recruitment 2017

Position 4. : IP Network Engineer

网络工程师（全职 地点：法兰克福）

- Daily maintenance and operation of network devices in China Telecom EMEA POPs, mainly Frankfurt. The network devices include CT global IP backbone, SDH/DWDM Sino-Europe backbone and Voice Switching equipment.
- Oversee installation, configuration, maintenance, and troubleshooting of customer's hardware and software.
- Maintain and update Operation Plan and other operational procedures, service availability report, traffic management reports and service improvement solutions.
- Monitor network stability, availability and performance. Ensuring 24x7x365 operation of internal and client systems. Identify, diagnose and resolve network problems as needed.
- Monitor and test network performance and provide network performance statistics and reports.
- Conduct research on network products, services, protocols, and standards to remain abreast of developments in the networking industry.
- Manage and maintain office IT network, systems and applications.
- Some business travels are required.

Required Skills and Experiences

- University graduate holder on Telecommunications or relevant areas
- CCNA / CCNP or equivalent certified
- Hands-on experience implementing and administrating network devices
- 3+ years of network administration mandatory
- Knowledge about VPN technologies (IPsec, MPLS)
- Knowledge of routing protocols: OSPF, EIGRP
- Excellent troubleshooting experience
- Very Familiar with SDH, DWDM optical transmission equipment (Huawei OSN) and other related IP products (Cisco or Juniper)
- Proficiency in both Chinese and German or English

Date of employment: 15.11.2017
