——Industrial robots, robotic arms, etc.

Qingdao Haizhichen Industrial Equipment Co., Ltd.

The company has independently developed a number of industrial technologies in the field of 2D vision and 3D vision, among which 2D vision has been successfully used in smart electricity meter character reading, emery line particle detection, huawei MATE9, apple 7 and other projects. 3D vision has been successfully used in welding seam tracking, guiding disordered grasping of robot, plane degree detection of mobile phone shell, height measurement of mobile phone shell, horn lead detection and other projects. The company has a number of invention patents, software copyright, utility model patents, to provide customers with good strength protection.

Energy-Electric equipment

Shandong BOS Energy Technology Co., LTD.

The main products are variable frequency power supply, stabilized voltage power supply, marine shore power supply, dedicated UPS, inverter for Electric Power, renewable energy grid inverter, modular inverter power supply, and energy feedback device such kind of energy saving products etc. BOS is one of the most influential " domestic leading enterprise". Our new production base of inverter, built in 2010, covers an area of 20000 square meters and the annual output can be 200000 sets of inverter. That can meet the needs of the rapid development market.

Display of Some Products
